

New update for your software

KaVo DIAGNOcam™ Vision Full HD / KaVo DIAGNOcam

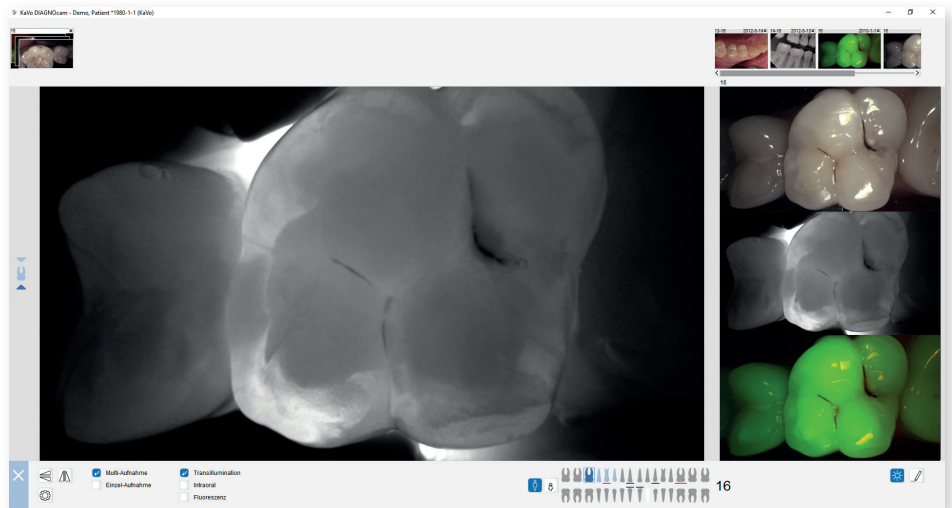

90095381_Rev0_en © Copyright KaVo Dental GmbH.

The new software update has additional functionalities that make it easier to operate your KaVo DIAGNOcam and enable operation of the new KaVo DIAGNOcam Vision Full HD.

Full integration of the KaVo DIAGNOcam Vision Full HD

The new KaVo DIAGNOcam Vision Full HD, as well as the existing DIAGNOcam, can now be used with all available functions in the DIAGNOcam software.

Within the software, you have the option of choosing between a single shot or multiple shots and taking a 3-in-1 shot in less than a second in the intraoral, transillumination and fluorescence modes.

Clear user interface in a new design

In order to emphasise the simplicity and clarity of the software, the user interface will be adapted to KaVo's new design style.

The existing functionalities are still available and can be used as usual.
