 Water hazard class 1 (German Regulation) (Self-assessment): Weakly water-endangering.
 Do not allow undiluted product or large quantities of it to reach ground water, water bodies or sewage system.
 At present there are no ecotoxicological assessments.
 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
 Very toxic for aquatic organisms
 The product does not contain organically bounded halogens (AOX-free).
 Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.
